

### GDR business

The cost of the system is € 750,- per morning/afternoon or € 1500,- for a full day. If the system is used on location (outside Alterra), the extra costs for transport and installation of the system will be added.

The costs of the facilitator depend on the time used for preparation and during the session. These cost will be calculated afterwards.

For more information, advice, quotations and (options) reservations, please contact one of the facilitators at Alterra:

Annelies Bruinsma, tel: +31 317 474244, e-mail: [annelies.bruinsma@wur.nl](mailto:annelies.bruinsma@wur.nl)

Marion Bogers, tel : +31 317 474610, email : [marion.bogers@wur.nl](mailto:marion.bogers@wur.nl)

## Group Decision Room (GDR)

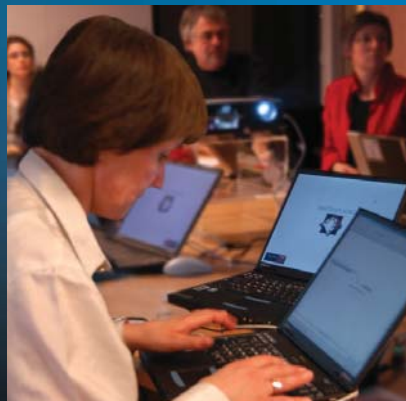

The Group Decision Room is located at Alterra, but can be used at any location. Are you looking for quicker results during meetings? The GDR can provide you with solutions. Whether you are interested in brainstorming, looking for support or improvement of decision making, the GDR stimulates the involvement of participants, clarifies the structure and aims of the meeting and quickly provides concrete results. And no input is lost!

The GDR is an electronic meeting system consisting of a network of 10 laptops and is very user-friendly. The participants can react to statements or questions, which are shown upon the screens, at the same time and anonymous. Results are projected on a central screen, so all are able to follow the process.

## Examples of GDR applications

The GDR can be used in any situation where a group of people have a common goal. For example:

- Brain storming
- Inventory of data
- Vote
- Inventory of opinions
- Making decisions
- Analysis of problems, cause and effect
- Structuring of subjects
- Writing articles or reports as a group
- Evaluation
- Exploring possibilities and solutions
- Interactive policy making
- Multi-criteria analysis of f.e. scenario's

## What are the advantages?

The system is anonymous, making it easier to express (different) opinions. Every participant has an equal opportunity to react; input is synchronous and therefore also quick. The input of others can have an inspiring effect. All information collected is preserved, nothing is lost. The data collected is easily transformed into a report, including the results of votes. Participants with different background, knowledge and interests can work together on solutions of problems: thus creating teamwork in a structured process.

## Where can a GDR session be held?

The GDR is available for sessions at Alterra in room B101. However, the system is mobile, so it can be used at any location.

## Who is responsible for what?

Each session is lead by a chairperson and a facilitator. The chairperson is chairing the meeting and is responsible for the process and outcome of the meeting, like in any other meeting. The facilitator is responsible for the operation of the system and supports the participants in using the system. The chairperson and the facilitator prepare the agenda of the meeting together, ensuring the input of the appropriate tools.
